About Me

Full-stack developer with 7 years of experience building web and mobile application. I work mainly with React, Next.js, NestJS and TypeScript. I'm comfortable taking a project from architecture to deployment. Outside of client work, I co-founded Ossau, a mobile app for the hiking community, built from scratch and now used by 2,000+ people.

Remote work

Available CET / ET / BRT
(Europe · US · Canada · Brazil)
